Generate **Soft-UI** CSS code

The screenshot shows the Neumorphism.io website, a tool for generating soft UI CSS code. The interface features a central preview area with a light gray rounded square on a white background. To the right is a control panel with sliders for Size, Radius, Distance, Intensity, and Blur, and a Shape selector with four icons. Below these is a code preview box showing CSS code for a button, with a 'Copy' button. The top of the page has the site name and a 'Generate Soft-UI CSS code' button. The bottom includes an 'Authentic' logo, a career advice banner, and a link to 'uiverse.io'.

Neumorphism.io
Generate Soft-UI CSS code

Pick a color: or

Size:

Radius:

Distance:

Intensity:

Blur:

Shape: ☐ ☐ ☐ ☐

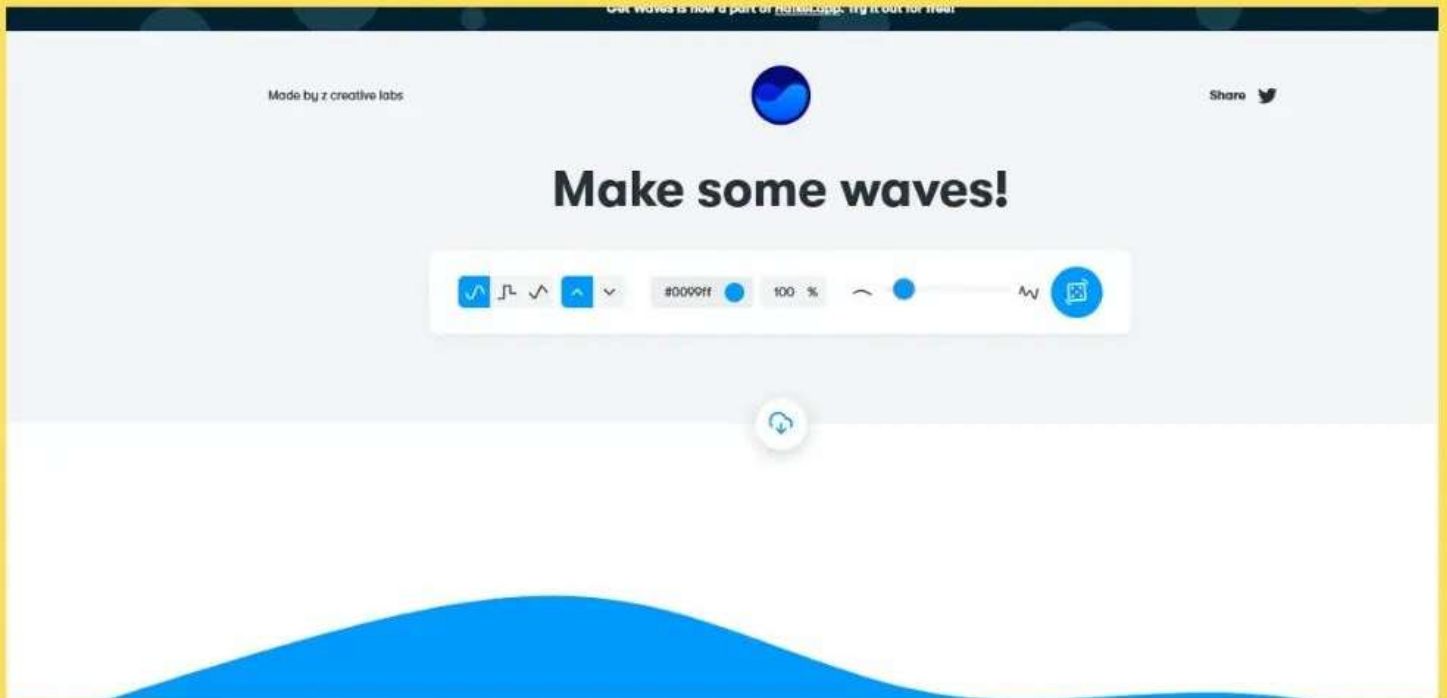

```
border-radius: 50px;  
background: #e0e0e0;  
box-shadow: 20px 20px 0px #e0e0e0,  
            -20px -20px 0px #ffffff;
```
